RETURNED PROM A PROSPECTING TRIP .- Professor Katersley returned to town yesterday from a ten days' expedition into the country around the head of the Victoria Arm. He was accompanied by an aid, and they ascended seven or eight miles the stream known as Deadman's River, which debouches into the Bead of the Arm. A geological examination of the banks of the river together with the seighboring districts was prosecuted, and almost everywhere with indications of either iron ore of various qualities, coal, gold. ac. The iron was found be to very generally distri-bated; the coal is believed to be a continuation of the Nanaimo and East Coast seam, and the gold was discovered in small quanti ties almost anywhere in their track. The Professor, from what he has witnessed, forms a very high opinion indeed of the mineral resources of the country, and believes that ere lung, they will be turned to good account. large morasses, easily convertible into the best of agricultural lands, were also met with. To-day a visit will be paid to Cowichan district, and an examination of the coal beds will be conducted before his return.

THE Pall Mall Gazette is appious for the abelition of courtesy titles which are unmeaning and confer no privileges, thinking it absurb that a learned Judge should be known as a "Knight Bachelor," or an ordinary man a "Knight of the Garier," Knight of the This-tle," a K. G." or a K, C. B." Americans rather run to titles, and if either of these were obtainable they would be common with a cortain class. As it is, they content them-selves with "General" "Colonel," "Major" and "Judge," the latter being very common.

PROVINCIAL DIRECTORS: J. C. DIETER, Esq., M. D. J. C. DIETER, Esq. MENRY ELLIOTT, Esq. J. K. SUTER, Esq. WILLIAM YOUNG, Esq.

Registered Office, Columbia Street NEW WESTMINSTER.

The Fraser River Beet Sugar Company, (Limited), has been formed for the purpose of Manufacturing Sugar from Beets, to be grown on land acquired by the Company, consisting of rich alluvial soil well adapted for their growth.

This land contains all the essentials necessary for the cultivation of the best description of Sugar Beet, being very rich in vegetable matter, and experience has shown that it is unexcelled for the purpose. Large tracts of equally valuable land can be had on very favorable terms; certainly not exceeding one tenth of the price of similar lands in California, and important consideration, as it will make a large difference in the amount of capital required. as it will make a large difference in the amount of capital required.

From experiments already made on the land, the yield was found to be equal, if not superior to that from land cultivated in the most favored localities on the most improved principles.

The percentage of Saccharine matter, according to published records of European cultivators, gives 8 to 9 per cent. as the average; whereas, in the Fraser Valley, the per centage was 10 to 11; six-tenths being granulated sugar of very fine quality, and the remainder molasses of fine flavor, a result unknown elsewhere.

This being the result on new land, and with the most imgerfect appliances, it will be readily understood, that with a proper system of cultivation, and with proper machinery, the profits of the company will be very large.

machinery, the profits of the company will be very large.

The quantity of sugar imported into this Province for the year ending June 30th, 1872, was valued at over \$100,000; the importation of Molasses, during the same period, amounted to \$18,000. It will, therefore, be seen that a ready market is open for all the sugar and molasses the company can produce. The pulp, or refuse, composes the best kind of food for fattening cattle during the winter months, when the highest prices are obtained for beef, mutton, &c.

The bost of labor, it is calculated, will be as low as in California, while the fuel and other materials, including the lumber for building, will be much lower.

As the company proposes to commence operations on a limited scale at first, the Capital Stock has been fixed at \$50,000, while power is reserved to the Shareholders to increase the warking capital to \$100,000, if considered advisable.

C. FRANCIS BARNARD, M.D. SURGEON DENTIST.

DR. BARNARD HAS had for SEVERA months the "Perkine Hyatt" or "Colleged Base," the newest and latest material adapted to the mounting of whole sets of teeth; he is also using "Whalebone Rubber," which is rapidly supplanting, for single dentures or partial sets, the best valuation of the set 25 years. as 25 years.

We cheerfully add Dr. B's Card to our columns, easinced that his good taste and judgment, united to natural skill and ingenuity, aided by an extensive practice of upwards of thirty years, render his services men variable and reliable than those of any other dentist at the Sound, Coast or Island. For details see daily Colonist. naist.
